

**Message from the CMC on the occasion of the 17th anniversary of
PLGA**

**Intensify and expand Guerilla War – People's War all over the
country!**

**Defeat the new counter revolutionary strategic offensive
'Samadhan' (2017-2022) of the enemy
to eliminate the Indian Revolution**

*Message from the Central Military Commission (CMC), CPI (Maoist) to all the Party
Committees, Members, Red Commanders and warriors of PLGA, People's Militia forces,
Leaders and activists of the Revolutionary People's Governments and Mass Organisations
and the Oppressed masses to celebrate the 17th Anniversary of PLGA from 2nd December to
the 8th with revolutionary enthusiasm and revolutionary spirit!*

**Central Military Commission
CPI (Maoist)**

**Intensify and expand Guerilla War – People's War all over the country!
Defeat the new counter revolutionary strategic offensive 'Samadhan' (2017-2022)
of the enemy to eliminate the Indian Revolution**

Dear Comrades and People!

December 2nd is the day that stands in the history of Indian Revolution. The people of the country remember this day as the day when in 2000 People's Liberation Guerilla Army (PLGA) was formed in the leadership of CPI (Maoist) to liberate the oppressed people of the country from the exploitation and oppression of imperialism, comprador bureaucratic capitalism and feudalism. PLGA was formed in the direction and guidance given by the founders of Indian Revolution and martyrs Comrades Charu Mazumdar and Kanhai Chatterjee, with the inspiration of our beloved leaders and martyrs Comrades Syam, Mahesh and Murali and with the spirit of thousands of martyrs, making true the long felt dreams of the oppressed people of India and the world. Our brave PLGA would complete 17 years coming December 2nd. On this occasion the Central Military Commission (CMC) of the CPI (Maoist) conveys red red salutes to all the Party Committees, Commands, Party Members, brave Commanders and warriors of PLGA, the leaders and activists of the Revolutionary People's governments and Revolutionary Mass Organisations, the members of People's Militia and the revolutionary people. CMC conveys revolutionary greetings to all the comrades in the country who took part in the efforts of multipronged (political, military and organizational) resistance to defeat

the counter revolutionary Operation Green Hunt. It pays humble homage to the martyred heroic guerillas and all the martyrs who laid their lives in various encounters, fake encounters, betrayals, covert operations of the enemy, accidents, in jails, with snake bites, ill-health and other such reasons. Let us learn their Communist values, unwavering courage and their dedication towards the people and gain inspiration. Let us pledge to make true their dreams and ideals. On this occasion CMC hopes that the comrades injured in guerilla war actions would recover soon and jump into the arena of war with war enthusiasm.

On this occasion CMC calls upon all the Party ranks, PLGA units, Revolutionary People's governments, Mass Organisations and people to celebrate the 17th Anniversary of PLGA from December 2nd to the 8th in the villages of the area of the movement, in the towns and all over the country with revolutionary enthusiasm and revolutionary spirit. It calls upon to take up recruitment campaign all through the month of December across the country to contribute to the consolidation of PLGA with the objective of defeating the counter revolutionary new strategic offensive 'Samadhan' (2017-2022) of the enemy.

Nearly 140 comrades laid their lives in the past one year to make the Indian New Democratic Revolution successful, dedicated to achieve the tasks of the Unity Congress-Ninth Congress, relentlessly making efforts to defeat Operation Green Hunt. More than 30 of them are woman comrades.

Out of the martyrs two are members of our Central Committee, 98 are from DK, 19 from BJ, two from Telangana, 7 from AOB, two from Odisha, one from West Bung, two from MMC and one comrade from the Western Ghats. Three of the martyrs are from the rank of State Committee, 7 from ZC/DvC, three from the Sub-ZC, 22 are AC/PPC, more than fifty are the members of Party and PLGA, nearly 40 militia activists and 15 revolutionary people.

The martyrs are – two leaders of Indian Revolution and members of our Central Committee Comrades Narayan Sanyal (Vijayda, member of Polit Bureau), Comrade Kuppu Devraj (Ramesh, Yogesh), State Committee rank comrades Raghunath Mahato (member of BJSAC), Himadri Roy (member of West Bung SC), Ajitha (Kaveri, member of SZC, Western Ghats).

On the occasion of the 17th Anniversary of PLGA let us memorise all the martyrs who laid their lives in the past one year and pay humble revolutionary homage to them. Let us pledge to fight until the end for achieving their ideal.

Our countrywide political, military and organizational effort to defeat Mission-2017 and the results

The Central and the State governments started the third phase offensive of Operation Green Hunt since the beginning of 2014 to eliminate the countrywide Revolutionary movement. Since NDA (National Democratic Alliance) in the leadership of Narendra Modi came to power in the centre these attacks have attained more fascist character and there is a rise in their severity and extent. PLGA-People's Militia, Revolutionary People's Governments, Mass Organisations and Revolutionary people in the leadership of our Party fought back Mission-2016 with multipronged counter offensive tactics and defeated it and so the enemy formulated Mission-2017. We intensified political, military and organizational effort all over the country depending on the strength of the movement and could contain Mission-2017 to an extent. The vital thing in this is the People's War-Guerilla War that continued resisting counter revolutionary war of the exploitive ruling classes. Along with this we also took up mass movements on the problems of daily life and fundamental problems, united activities increased and anti-displacement struggles intensified and expanded. These and other such things contributed a lot in fighting back the enemy offensive. With the Leadership Training Program to train the leadership in the Party and Military fields in all levels, Social Investigation with the aim of formulating new tactics, taking up Agrarian Revolutionary Program-Revolutionary reform helped us achieve better results.

Let us see the actions of People's War-Guerilla War of PLGA and revolutionary people in the leadership of the Party to defeat Mission-2017

In the past one year 72 police, Para-military, Commando forces were eliminated and 96 injured. 35 modern weapons including 21 AK and nearly 3500 rounds of ammunition were seized. Forty police informers, two enemies of the people and six enemy agents were eliminated. Roads, culverts, mobile towers, Railway lines, vehicles and timber were burnt or destroyed to stop the projects of various kinds of comprador corporate classes that displace the people.

Four big actions – KothaCheruvu, Burkopal, Karampalli and Thondamarka took place among the actions of retaliation in the Tactical Counter Offensive Campaigns in Dandakaranya. Much other small and medium kind of actions took place. These actions, especially the Burkopal ambush instilled new enthusiasm and confidence in the revolutionary camp not only in the country but also across the world. It gave a severe blow to the morale of the enemy forces.

TCOC and the retaliatory actions in DK gave strong resistance to Mission-2017. Along with these actions, there were guerilla war actions. The enemy took these, the extent of mass base that led to the success of these actions, the domestic and international situation into consideration and changed their strategy in Mission-2017. They had to formulate a new counter revolutionary scheme and strategy-tactics to eliminate the Indian Revolution with the name of 'Samadhan' for the coming five years (2017-2022).

The TCOC and retaliatory actions of DK helped in the protection of guerilla bases. Big actions like Burkopal stood vital in the protection of the guerilla bases. The TCOC this year gave a new experience in the construction of Improvised artillery and expanded its utilization. There were widespread sniper actions. The Central and the State governments stopped all kinds of resources for the revolutionary movement and attempted to lessen the extent and severity of war actions. The guerilla war actions of DK are attaining new experience as a counter to this ill scheme and are instilling self-confidence in the revolutionary camp. The new experiences of DK Guerilla zone in the recent time are the Burakopal kind of joint operations by concentrating PLGA forces, building primary level artillery basing on local resources, training snipers and the intensification and extent of mine warfare through improvised explosive devices. These experiences help for the development of the PLGA forces in various guerilla zones and red retaliation areas all over the country.

In the TCOC in AOB in 2016-2017, 15 policemen died and 21 were injured. Out of these retaliatory actions Mungaru Gummi-Sunki ambush is a big kind of action. In this 9 OSAP (Odisha State Armed Police) were wiped out and four were injured.

In Telangana four policemen died and three were injured in the guerilla war actions in 2016-2017. These taking place of guerilla actions of Telangana where policemen were wiped out is a good development after many years.

In Madhya Pradesh-Maharashtra-Chhattisgarh (MMC) in the guerilla war actions in 2016-2017 four policemen were wiped out and three were injured.

In Odisha one policeman died and seven were injured.

On the whole 96 policemen were wiped out and 134 were injured in DK, AOB, Telanana, Odisha and MMC of the Central Region, in the past one and a half years.

In the Eastern Region, in the more than 40 retaliatory actions in Bihar-Jharkhand, East Bihar-North East Jharkhand and West Bung states, twelve policemen were wiped out and seven injured in the past ten months. An anti-people political leader and ten counter revolutionaries were eliminated. Crores of rupees of properties of the government, exploitive classes and comprador bureaucratic corporate companies were destroyed.

In the past ten months PLGA took up more than 200 guerilla attacks in the guerilla zones in Chhattisgarh, Maharashtra, Bihar, Jharkhand, AOB, Odisha, Telangana, MMC, West Bung and Western Ghats. More than 110 police were wiped out in these attacks and nearly 135 injured. Seventy-five people's enemies, anti-people political leaders, counter revolutionaries, informers and coverters were eliminated. Thousands of people were mobilized in the areas of our revolutionary

movement in anti-feudal, anti-imperialist, anti-displacement people's struggles and against state violence, in which especially women's participation was in a big number.

Thus, depending on the experiences of the areas of revolutionary movement, applying these experiences to the specific conditions in the newly expanding areas in the guerilla zones and red resistance areas in DK and BJ, intensifying and expanding the guerilla war going on in the respective areas, mobilizing the people in a large way across the country and intensifying anti-feudal, anti-imperialist class struggles, we can undoubtedly declare that we can defeat the 2017-2022 new counter revolutionary scheme of the Central government.

When compared to 2016 there is a rise in the intensity and extent of guerilla war actions all over the country in the past ten months. However we lost the subjective forces of our Party, PLGA and Mass Organisations in the intensified enemy attacks. Enemy also got hold of a considerable number of our Arms and Ammunition. As Comrade Lenin said, the advancement of People's War-Guerilla War through defeating counter revolution is as much a fact as revolution fights back counter revolution. It shall advance invincibly only by formulating counter tactics to the enemy schemes, concentrating the whole forces for the implementation of the same, making PLGA firm in the leadership of the Party against the various non-proletarian trends and mobilizing and arming the people and intensifying People's War.

'Samadhan' strategy is the new counter-revolutionary scheme of the enemy after Burkapal ambush

The countrywide guerilla actions of our PLGA in the TCOCs and retaliatory actions gave a stiff resistance to Mission-2017 of the enemy. Especially after the Burkapal ambush the Indian exploitive ruling classes, the Central and the state governments were deeply worried. They held a high level meeting on the 8th of May in Delhi in the direction of the Central Home Minister and formulated new counter revolutionary scheme-strategy and tactics for the elimination of Indian Maoist movement. As per this counter revolutionary scheme they decided its aim to wipe out the Maoist movement in the country in the coming five years (2017-2022). The main points in the strategy and tactics of this counter revolutionary scheme are like this –

They decided that the police, Para-military and Commando forces engaged in anti-Maoist operations must shed methods of self-defense and take up offensive attacks, penetrate into the areas of strong hold of the Maoist movement and make attacks. It means they will concentrate on attacking our guerilla bases and strategic areas.

They decided to make aerial attacks through Indian Air Force and the air borne forces of the various Para-military forces (forces that make attacks with war planes and helicopters).

They are arranging a mechanism to provide 24 hours Air support in various areas of Bastar range to make aerial attacks and to shift the injured police in the Maoist attacks. In the coming days they will develop the mechanism providing air support to make such attacks if necessary in the areas of our movement and strategic areas. Depending on all these they will also intensify attacks on PLGA forces in the night.

They will expand and strengthen the intelligence system. Along with human intelligence they would especially expand technical, electronic intelligence and strengthen it. UAV/Drones, Satellites, GPS, Thermal Imaging, Infrared technology, CC TV cameras and Radars shall be used to collect intelligence.

Enemy shall severely try to change persons helping us in civil and military supplies and other works as informers and coverts. There shall be constant severe vigilance on the movements of PLGA through various kinds of technical and electronic intelligence.

The centre of strategic command of CRPF was shifted from Kolkata to Raipur to efficiently run these counter revolutionary attacks. In addition to the Unified Command in state level in Chhattisgarh until now they decided to form Operational and Tactical Unified Commands in the district level.

As per this the civil, police, Para-military and Air force officers of the respective districts shall be part of this Unified Operational Commands to plan operations in the district level. Tactical Unified

Commands will be formed with the high level officers of the central and the state forces that go to implement these operations in the field.

They decided to have better coordination by rectifying the shortcomings in the coordination between the central and the state police forces. According to this they decided that the state forces must constitute one third of the forces going for combat operations, for the protection of road construction, ROP and other such work and the local forces must be in the forefront.

They decided to take up large scale ill propaganda campaign describing us as anti-development when we oppose the infrastructural work like laying of roads and bridges, communications, fiber optical network, Railway and electricity lines – the ‘development’ necessary for the exploitation of imperialist, comprador bureaucratic bourgeois classes and when we eliminate the police and Para-military forces coming for the protection of such works.

They decided to obtain support from Israel in counter insurgency and counter terrorist operations. They are imparting training to the Indian Para-military and Air force from Israel to make attacks on the Maoist forces. They are importing ultra-modern, bio-tech weapons and technology.

They formulated special scheme to make attacks in Sukma district of Dandakaranya as core area. They decided to deploy two battalions of COBRA for this purpose.

They decided to give a blow to the economic resources of Maoists to control their activities.

The Central Home Ministry announced their present strategy of ‘Samadhan’ with the eight letters as eight kinds of practice of their strategy and tactics – S is Smart Leadership, A is Aggressive strategy, M is Motivation and training, A is Actionable intelligence, D is Dash board based indicators, H is Harnessing technology, A is Action plan for each threat, N is no access to financing. This is their strategy.

On the occasion of August 15th Prime Minister Narendra Modi announced the agenda of developing India as a ‘new India’ by the time of the 75th Anniversary (2022) of quit India. Modi have a call to eliminate dirt and make clean, to eliminate poverty and develop and to build an India without corruption, terrorism, casteism and fundamentalism. This is only to deceive the ordinary people. The actual objective hidden in this agenda is to build an India without any hurdles to the class interests of imperialism, comprador bureaucratic bourgeois and big landlords and to stabilize the power of the imperialist, comprador bureaucratic bourgeois, big landlord classes. The actual aims of ‘Nava Bharath Nirman’ (building of new India) are like this – India should be a reliable servant to US imperialism in South Asia and fight China. The oppressed castes, especially the Dalits must be suppressed to stabilize the hegemony of the higher castes in the country (in their language this is the casteless). Brahmanical Hindu fascism must be strengthened by suppressing the religious minorities (in their language this is the communal less). Class struggle and the Maoists waging Armed struggle against imperialism, comprador big bourgeois and big landlord classes must be suppressed, the National Liberation Struggles of Kashmir and North East must be suppressed (in their language this is the elimination of terrorism) to establish ‘Hindu Raj’. So the aim of the Indian exploitive ruling classes is to totally wipe out the Indian revolutionary movement for the building of ‘Nava Bharath’. We can understand the fascist character of ‘Samadhan’ only when we understand both these together.

The main concentration of this counter revolutionary new scheme and strategy-tactics would be in Dandakaranya, Bihar-Jharkhand but it aims to wipe out the revolutionary movement of the country. The whole revolutionary camp must be prepared to take up active efforts to enlighten and consolidate the people in a large scale to fight back this scheme.

Let us utilize the domestic and international situation turning favorable to revolution and defeat the enemy offensive

Since the central and the state governments are implementing globalization policies and anti-worker, anti-farmer policies as a part of it for the past 26 years since 1991, the lives of worker peasant masses have become miserable. The industrial and service sectors are going into the hands of Multi-National corporate organisations and the namesake rights of the workers too are being violated. This brought lakhs of workers of the organized and unorganized sectors on the roads and

they are in the path of struggle. There is severe repression on the worker's movements and the leadership. Many leaders of the movement are foisted with false cases and are facing life imprisonment. But the workers' movements are going on in a militant manner. On the other hand the agricultural sector is in crisis. Farmers are affected with the burden of loans due to less remunerative prices. The central and the state governments are implementing the dictates of the World Bank for the past two and a half decades due to which the Indian Agricultural sector was affected. Two and a half lakhs of farmers committed suicide in the three years of Modi rule. The farmers of Madhya Pradesh, Maharashtra, Gujarat, Punjab, Telangana, Uttar Pradesh, Chhattisgarh, Jharkhand, Rajasthan and Tamilnadu took up militant agitations for remunerative prices in the recent period. In the coming time the peasant struggles shall grow more militant and be consolidated.

In the name of war on black money, corruption and terrorism the Modi government suddenly demonetized the big currency notes. This did not contain black money and more over severely affected agriculture, small industries, unorganized sector and retail trade. In addition to demonetization the pro imperialist policies of the Modi government led to the slowdown of industrial growth. Due to all this the 'growth rate' of Indian economy was severely affected. Inflation is on the rise. Small capitalists, traders and all sections of the society are facing severe problems.

There are eighteen crores of educated unemployed in the country. The electoral assurance of Modi that they would provide jobs and employment to one crore per year proved to be false in the past three years. In the three years Modi government provided only 2.5 lakh jobs. While one crore and thirty lakh people are coming into the job market each year with degrees in their hands, the central and the state governments are unable to provide jobs for them and proved to be anti-people. There are increasing conditions that this army of the unemployed shall take up militant struggles in the coming years.

Presently US president Donald Trump is following the policies of first preference to the Americans (first employing the Americans and paying them better) and made changes regarding H1B visa. Thus the opportunities for employment to those who wish to go to the US for jobs have reduced. Britain, Australia, Singapore and other imperialist and capitalist countries too imposed many sanctions on immigration. With this nearly 5-6 lakhs fell in a vulnerable situation of losing jobs in the Indian IT industry. On the other hand the economic crisis continues in the international level. The employees of Indian origin in the foreign countries are removed and there are no new job opportunities. There are increasing attacks with racial discrimination on the Indians in many countries including America. Thus the employees and students of the IT industry and other fields are taking up the path of struggles.

GST came into implementation since July 1st in the name of one country-one tax that affected lakhs of small producers and small traders all over the country and gave way to a situation of the rule of only the Multi National Organisations, their comprador products and business branches. So the coming days shall see the struggles of small producers and small traders too.

The offensive of Brahmanical Hindu fascism is taking a severe form on the Dalits, Adivasis, Religious Minorities, Women, Oppressed Nationalities and Progressive intellectuals day by day. These sections are taking up struggle against this in various forms. Of late there are relentless such attacks. In Karnataka famous progressive magazine editor and writer Gowri Lankesh was murdered. In Gujarat the Dalits were attacked in Una. After their resistance there are non-stop attacks on the Dalits in Saharanpur of Uttar Pradesh and other places. Military and Para-military employed severe repression on the Kashmir National Liberation struggle and the militant struggle with the demand of Gorkhaland. There are increasing attacks on the students of Universities. Especially there are imposing Manudharma on the women students with patriarchal sanctions. In this background conditions are maturing towards the direction of united and militant struggles against Brahmanical Hindu fascism starting from the local level to the centre. The Hindu fascist offensive is intensifying the fundamental contradictions in the Indian society. These are forming more favorable conditions for the formation of United Front against Brahmanical Hindu fascism.

The financial crisis that started in the US in 2008 and expanded to the whole world is not yet solved. All the attempts of the imperialist countries to solve this crisis are failing. With this the imperialist countries have chosen economically protectionist policies, politically fascism and militarily war as the way for solution. Thus all the fundamental contradictions are intensifying.

Middle East, the area of South China Sea and Korea Island collective have become the centre for conflicts between imperialist US, Russia and China. US deployed more than five lakhs of US and South Korean forces in the Asia-Pacific area against China and North Korea. Imperialist China is making preparations since the beginning in its exploitive interests. Imperialist Russia on one hand is increasing friendship with China and is countering US to sustain its position in the Middle East.

China Belt and Road Forum (BRF) arranged a two day meeting in capital Beijing in the month of May this year to discuss the One Belt-One Road (OBOR) project. Leaders of 29 countries and representatives from more than one hundred countries participated in this meeting. US opines the One Belt-One Road scheme shall become a major challenge to its hegemony in the world economic order.

The policies of US President Donald Trump to revive the hegemony of US imperialism are turning to be a major danger to the world peace. Immediately after Donald Trump came to power he enhanced US forces in Syria and Afghanistan and intensified attacks. He made evil schemes to pose Saudi Arabia against Iran and saw the tensions between the two countries do not cool down, in order to permanently find place in the Middle East and exploit the oil and the markets there. He made agreements to sell weapons of a value of 35,000 crores of dollars to Saudi Arabia in this decade. He added Sunni-Shia conflicts to the conflict between Saudi Arabia and Iran and ignited the conditions for a permanent division of all the Middle East countries as two opposing parts. He is posing Japan, South Korea, Australia and India against China. All these developments create major danger to the world peace.

As a result the developments are turning favorable to revolution and the world proletariat, revolutionaries and revolutionary parties must utilize this. As a part of this it is necessary to intensify People's War against imperialism and its domestic compradors.

The financial and political policies of the imperialist countries are creating the opportunities for the growth of right fascist parties of the exploitive classes in those countries and also creating favorable conditions for the birth of proletarian, Communist Parties, for the growth of small parties to big parties and to take up militant struggles.

Due to the intensity of imperialist, comprador bureaucratic bourgeois, feudal exploitation and oppression in our country adivasis are losing their power on the forests, workers and employees are losing their jobs, students are not assured of jobs, the Dalits, Muslims, Adivasis and Oppressed Nationalities are facing Brahmanical Hindu fascists and are mobilising in an unprecedentedly extensive and militant manner. The trend is on the rise. These movements growing extensively and militantly are the biggest source and basis for the advancement of revolutionary movement and for defeating the enemy offensive. Let us formulate necessary tasks and tactics according to the favorable conditions growing internationally and domestically and defeat the enemy offensive. Let us advance the Indian New Democratic Revolution.

Tasks

The circular 'Present situation-Our tasks' of the CC released in February 2017 directed regarding the tasks to be fulfilled and the tactics to be taken up in the coming two years. In view of this we have to work to fulfill the below mentioned tasks.

1. Concentrate on defeating the counter revolutionary 'Samadhan' offensive of the central and the state governments in a bid to eliminate the Indian Revolutionary Movement!

The new counter revolutionary 'Samadhan' offensive of the central and the state governments is a multipronged offensive. This offensive formulated in the guidance of LIC strategy will be implemented in all the political, economic, military and cultural sectors in the most fascist methods with tactics deceiving revolutionary masses, Party cadres and PLGA warriors together with a large scale psychological war. It will go on as perception management to mold the ideas of the people in

their favor. We can understand this offensive in a comprehensive manner only when we understand it together with the strategic scheme of the Indian exploitive ruling classes for 'Nava Bharath nirman' (building of new India). So the cadres of the Party, warriors of PLGA must politically understand the conspiracy of 'NavaBharath nirman' and the fascist character of Samadhan offensive and explain to the revolutionary masses.

Though the new counter revolutionary scheme of the central and the state governments to eliminate Indian Revolutionary movement is occupational, we have to properly analyse the strength and weakness of it and our strength and weakness in facing them. Based on this understanding we have to formulate offensive-self-defense tactics to face this counter revolutionary offensive. We have to provide this understanding to our Party, PLGA cadres, to the local organisations and the revolutionary masses. We must politically prepare all of them to face the enemy offensive. This is important.

2. Take up countrywide political exposé propaganda movement to expose this scheme of the Indian exploitive ruling classes in the name of 'Nava Bharath' to stabilize their power!

We must explain to the people about the 'Nava Bharath nirman' and tell them not to fall in this deception in this manner – Poverty will not be ridden only by giving a few houses to the rural and the urban poor in the name of 'eradication of poverty'. This is only to see that the social unrest rising among the oppressed masses of the country due to the pro imperialist, anti-people, anti-nation policies of the exploitive ruling classes does not transform to be a source of revolution. The problem of the rural and the urban poor people is the question of land. It is the question of power on instruments of production and state power. Unless it is solved any of the reforms of the exploitive ruling classes will not eradicate poverty. The exploitive ruling classes have been deceiving the people of the country with fake development activities for the past 70 years.

3. Expose the war frenzy and national frenzy of the Indian exploitive ruling classes!

The Indian exploitive ruling classes have been instigating war frenzy and national frenzy to divert the people from socio-economic problems like poverty, illiteracy, diseases, starvation deaths and farmer's suicides. We have to politically enlighten the people and see that they do not fall into such things. If the oppressed class and the proletariat go into such things, revolutions will fail.

4. Mold PLGA and United Front as strong instruments in the hands of the Party against rising fascism!

Rising fascism intensifies the contradictions in the society much more. As a result of this the revolutionary conditions might turn to be a revolutionary crisis. In such a situation the politically enlightened forces will have a favorable condition. They inspire the people, mobilise lakhs of them and play the role of creating mass upsurges. They can bring a change in the balance of forces. So PLGA and United Front must be molded as strong instruments in the hands of the Party and made to play such a role. For this they must understand the political changes and develop accordingly. They must acquire the initiative and flexibility.

Build a broad United Front and a strong militant movement against Brahmanical Hindu fascism with the Revolutionary forces, Democrats, Progressive forces, organisations, Religious minorities, Secularists, Dalits, Adivasis and Women!

5. Intensify anti-imperialist, anti-feudal, anti-state class struggles all over the areas of the movement!

We must mobilise the landless, poor and the middle class peasantry in the vast countryside into class struggles against the exploitation and oppression of landlords, money-lenders and traders. People must be organized into political agitations in a large scale against imperialist globalization and on political, economic and social problems like displacement. These must be united with People's War. Revolutionary, Democratic organisations, forces, individuals and the vast masses must be mobilized and a strong people's movement must be built on a broad basis.

Take up Social Investigation and Class analysis in all the States/Special Areas/Special Zones with the objective of developing the tactics of People's War according to the transforming social conditions!

Formulate proper tactics on this basis, apply it to the specific conditions creatively and advance the People's War invincibly!

Take up programs to enhance the theoretical level of the Party, the military leadership ranks and activists!

6. Consolidate PLGA in a political, military and organizational manner!

We must pay attention to increase recruitment into PLGA from all the areas of the movement over the country. We have to intensify class struggle to develop mass base, identify the active and militant forces that come forth in this struggle, pay attention to them and increase recruitment. Where the movement is weak, we have to recruit limited persons and in places where the movement is relatively strong we have to recruit in scores and hundreds.

Call of the Central Military Commission

It is seventy years since the transfer of power on the 15th August 1947. In the past 70 years all kinds and colors of political parties of the country were in power either in the centre or the state. But these parties and the parliamentary system utterly failed in solving any of the problems in the daily life or the fundamental problems of the people. In future too these political parties and parliamentary system cannot solve the problems of the people. Now the 'Nava Bharath Nirman' that Narendra Modi preaches too cannot solve the people's problems. It shall only more stabilize the exploitive classes but shall not eliminate poverty, casteism and communalism. Believing the agenda of Narendra Modi means nothing but being deceived once more. So the people of the country should not be deceived once more and have to advance in the path of Armed Struggle for the success of New Democratic Revolution.

None of the oppressed classes and oppressed social communities was left un-attacked by the Brahmanical Hindu fascists in the past three years of Narendra Modi's rule. Neither the opposition parties nor the NGOs have the strength to stop these attacks. In order to fight back these attacks the oppressed masses and the people of the oppressed social communities must organize in the Communist Party of India (Maoist) and PLGA, become armed and resist. So the Central Military Commission calls upon the people of the oppressed classes, oppressed social communities, religious minorities and oppressed nationalities to recruit into the CPI (Maoist) and PLGA.

Propagate in a big way the courageous TCOC and the retaliatory actions of PLGA to defeat Operation Green Hunt all over the country in the past one year. Take up campaign for recruitment in the whole month of December.

- **Defeat the new counter revolutionary 'Samadhan' offensive! Eliminate the enemy and seize arms!**
- **Surrendering to the enemy is equal to slavery! Fight back the LIC policy of the enemy of surrender showing many kinds of greed!**
- **Consolidate the Party, PLGA and United Front!**
- **Recruit youth in a large number into PLGA!**
- **Intensify anti-feudal, anti-imperialist class struggle!**
- **Build strong and militant movement against Brahmanical Hindu fascism!**
- **Long live Marxism-Leninism-Maoism!**
- **Long live PLGA!**
- **Long live CPI (Maoist)!**

14-10-2017

**Revolutionary Greetings
Central Military Commission (CMC)
CPI (Maoist)**
